

AEV

Our Story

Advanced EV was created by Golf Car Dealers with over 35+ years in the industry.

With years of experience as a dealer came years of headaches. Plagued by vehicle performance issues, difficulty obtaining parts, and inconsistent quality of golf carts in the market, the creators of Advanced EV sought to create a brand that would stand out. By surveying the market, they were able to incorporate the best golf car features into a single brand. Combining new features with time-tested ideas, Advanced EV was born.
